## Abstract of JP11126126

**PROBLEM TO BE SOLVED:** To provide a scroll switch device capable of selecting and deciding the operating instruction on the information display part of a portable telephone set only through one time of key operation. **SOLUTION:** This scroll switch device 1 for portable telephone set is provided with a decision switch 2 mounted on the portable telephone set so as to the operating instruction, plural select switches 3 arranged around the fix switch 2 so as to respectively move a cursor in peculiar direction on the information display part of the portable telephone set, and a button key 5 whose central part is positioned oppositely to the decision switch 2. The operation of selection is performed by operating the select switch 3 by operating the peripheral part of the button key 5, and decision switch 2 is operated by operating the central part of the button switch 5, thereby deciding the operating instruction subjected to cursor setting on the information display part.
